

# Anthony Moss

Full-Stack Software Engineer

Atlanta GA, 30305 | Cell: (860)-970-6199 | Email: [asmoss93@gmail.com](mailto:asmoss93@gmail.com) | Github: <https://github.com/Anthony-Moss>

LinkedIn: <https://www.linkedin.com/in/anthony-moss-16ab64112/> | Portfolio: <https://anthonymoss.dev>

## Summary

Innovative technology professional with successful engagements in early stage tech start-ups as financial/investment services companies. Highly skilled in software and product development, problem solving, innovation and strategic thinking. With a tendency towards urgency and a roll up your sleeves attitude, I achieve goals and get things done. I also have a deep passion for executing to exceed client expectations.

## Skills

React, Redux, JavaScript, Node.js, PostgreSQL, React Native, HTML5, CSS, Express, AWS, Github

- Excellent problem solver and critical thinker
- Strong interpersonal skills
- Team Player
- Detail and goal oriented
- Customer Solutions oriented
- Extremely passionate, driven and curious

## Education

### DigitalCrafts Immersive Fullstack Developer Bootcamp

February 2019 - June 2019

- Software engineering training course covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Clemson University | B.S. Economics | Clemson, SC

August 2011 - December 2015

## Projects

- **Hero Quest** | <https://heroquest.cashcurls.tech> | <https://github.com/Anthony-Moss/hero-quest> May 2019

Hero Quest is a 2D turn-based adventure RPG build with React, Redux, Node.js, PostgreSQL, HTML and CSS. The game is a homage to 2D RPGs of the days past such as Final Fantasy. You control a character with the arrow keys, traverse the different maps, fighting different monsters with the goal of getting stronger and to defeat the Dragon in the final cave and save the town. My primary responsibility was the react and redux and finishing the backend and connecting it to the front end.

- **Do The Thing** | <http://dothething.chastityduhaney.com> | <https://github.com/Anthony-Moss/DoTheThing> April 2019

A support ticketing application built with JavaScript, Node.js and PostgreSQL to help track support tickets and ensure completion. It allows for anyone to create a ticket; tickets are placed into a queue and then allow users to grab or assign the ticket/tasks to themselves to work on and complete it along with add any notes about the ticket. The application can easily be modified to act as a productivity tool for employers to track the work of their employees as well.

## Experience

June 2018 - February 2019

### Iron Oaks Wealth Advisor, Atlanta, Ga - Para-planner

- Collaborated with 3 of the top producing financial Advisors in Atlanta scaling their practices and influencing in all areas of the business.
- Functioned as the IT department of the firm, handling all technical issues clients would have as well as in house support for other employees.

March 2015 - January 2018

### E\*TRADE Financial, Alpharetta, GA - Senior Financial Service Representative

- Serviced clients via our chat platform as well as the phone often dealing with multiple customers simultaneously.
- Assisted clients with technical issues with E\*TRADE's website and trading application

May 2013 - August 2014

### Rubicon Global, Atlanta, GA - Customer Liaison/Intern

- Serviced clients via setting up and dispatching service runs/pickups, as well as optimized client costs by right-sizing their service by analyzing client specific needs.
- Created and implemented new organizational system for all invoices for company.
