Projects

- **Do The Thing** | URL | https://github.com/Anthony-Moss/DoTheThing   April 2019
A support ticketing application built with JavaScript, Node.js and PostgreSQL to help track support tickets and ensure completion. It allows for anyone to create a ticket; tickets are placed into a queue and then allow users to grab or assign the ticket/tasks to themselves to work on and complete it along with add any notes about the ticket. The application can easily be modified to act as a productivity tool for employers to track the work of their employees as well.

- **WannaBeer** |URL| https://github.com/Anthony-Moss/wannaBeer   March 2019
Member of a 3 person team building a brewery location website where users can see information about breweries near their location. Primary responsibilities covered working with all of the API's. Built with HTML, CSS, and Javascript

Experience

June 2018 - February 2019
Iron Oaks Wealth Advisor, Atlanta, Ga – *Para-planner*
- Collaborated with 3 of the top producing financial Advisors in Atlanta scaling their practices and influencing in all areas of the business.
- Functioned as the IT department of the firm, handling all technical issues clients would have as well as in house support for other employees.

March 2015 - January 2018
E*TRADE Financial, Alpharetta, GA – *Senior Financial Service Representative*
- Serviced clients via our chat platform as well as the phone often dealing with multiple customers simultaneously.
- Assisted clients with technical issues with E*TRADE's website and trading application

May 2013 - August 2014
Rubicon Global, Atlanta, GA – *Customer Liaison/Intern*
- Serviced clients via setting up and dispatching service runs/pickups, as well as optimized client costs by right-sizing their service by analyzing client specific needs.
- Created and implemented new organizational system for all invoices for company.
